

Programming Languages + Lecture Structure

1. HTML (HyperText Markup Language)

1. Introduction to HTML
2. HTML Document Structure
3. HTML Elements & Tags
4. Headings, Paragraphs & Text Formatting
5. Links and Navigation
6. Images and Media
7. Lists (Ordered, Unordered, Description)
8. Tables in HTML
9. Forms and Input Fields
10. Semantic HTML
11. HTML Attributes
12. HTML Entities & Symbols
13. HTML Best Practices
14. Building Your First Web Page

2. CSS (Cascading Style Sheets)

1. Introduction to CSS
2. CSS Syntax & Selectors
3. Colors, Backgrounds & Gradients
4. Typography & Fonts
5. Box Model
6. Margins, Padding & Borders
7. Display & Positioning
8. Flexbox Layout
9. CSS Grid
10. Responsive Design & Media Queries
11. Animations & Transitions
12. Pseudo-classes & Pseudo-elements
13. CSS Variables
14. Building a Responsive Layout

3. JavaScript

1. Introduction to JavaScript
2. Variables & Data Types
3. Operators & Expressions
4. Control Structures (if, loops)
5. Functions
6. Arrays
7. Objects
8. DOM Manipulation
9. Events Handling
10. ES6+ Features
11. Asynchronous JavaScript (Promises, Async/Await)
12. Error Handling
13. Working with APIs
14. Building an Interactive Project

4. Python

1. Introduction to Python
2. Variables & Data Types
3. Operators
4. Conditional Statements
5. Loops

6. Functions
7. Lists & Tuples
8. Dictionaries & Sets
9. Strings & String Methods
10. File Handling
11. Exception Handling
12. Object-Oriented Programming
13. Modules & Packages
14. Building a Python Project

5. Java

1. Introduction to Java
2. Java Syntax & Structure
3. Variables & Data Types
4. Operators
5. Control Statements
6. Methods
7. Arrays
8. Strings
9. Object-Oriented Programming
10. Inheritance & Polymorphism
11. Exception Handling
12. Collections Framework
13. File Handling
14. Building a Java Application

6. C++

1. Introduction to C++
2. Variables & Data Types
3. Operators
4. Control Structures
5. Functions
6. Arrays
7. Pointers
8. References
9. Classes & Objects
10. Constructors & Destructors
11. Inheritance
12. Polymorphism
13. File Handling
14. Building a C++ Project

7. C#

1. Introduction to C#
2. .NET Framework Basics
3. Variables & Data Types
4. Operators
5. Control Structures
6. Methods
7. Arrays & Collections
8. Object-Oriented Programming
9. Exception Handling
10. File Handling
11. LINQ Basics
12. Delegates & Events
13. Async Programming
14. Building a C# Application

8. PHP

1. Introduction to PHP
2. PHP Syntax
3. Variables & Data Types
4. Operators
5. Control Structures
6. Functions
7. Arrays
8. Forms Handling
9. Working with Files
10. Sessions & Cookies
11. MySQL Integration
12. Object-Oriented PHP
13. Security Basics
14. Building a Dynamic Website

9. Go (Golang)

1. Introduction to Go
2. Variables & Data Types
3. Constants & Operators
4. Control Structures
5. Functions
6. Arrays & Slices
7. Maps
8. Structs
9. Interfaces
10. Goroutines
11. Channels
12. Error Handling
13. Packages & Modules
14. Building a Go Application

10. Rust

1. Introduction to Rust
2. Variables & Mutability
3. Data Types
4. Control Flow
5. Functions
6. Ownership Concept
7. Borrowing & References
8. Structs
9. Enums & Pattern Matching
10. Error Handling
11. Collections
12. Modules & Crates
13. Concurrency
14. Building a Rust Project
